*Professional Summary*

I am a Passionate Software Engineer specializing in SharePoint development and modern web technologies. My expertise spans both SharePoint On-Premise and SharePoint Online environments, including site branding and customization, content migration, permissions management, and the creation of sites, libraries, and web parts. I leverage the Power Platform (Power Apps, Power Automate, Power BI), SharePoint Designer, Visual Studio, and Microsoft 365 to streamline business processes, enhance collaboration, and boost productivity.

In addition to SharePoint, I build scalable full-stack applications using React, Node.js, Express, and MySQL, as well as ASP.NET, C#, JavaScript, HTML, Bootstraps and CSS ensuring optimal performance, security, and user experience. I am passionate about transforming complex ideas into efficient, functional, and visually engaging solutions. Continuously learning emerging technologies and best practices, I strive to stay at the forefront of the ever-evolving tech landscape.

---

*Technical Skills*

- *SharePoint Technologies: SharePoint Online, SharePoint 2013/2016/2019, CSOM, REST API*
